OBJECTIVE: Seeking a challenging position as a Managed File Transfer Administrator (MFTA) where I can use my diverse skills as a project manager and systems administrator. Eager to apply my experience in web development, IT solutions, and cross-platform expertise to ensure secure and efficient file transfer processes within an organization.

SKILLS:

Over 25 years of experience in information technology consulting including:

- Managed File Transfer Protocols: FTP, SFTP, HTTP, HTTPS, SCP, SSH, Mosh
- Systems Administration: Mac, Windows, Linux (Ubuntu, Debian, Red Hat), FOSS as well as commercial software.
- Network Administration
- Project Management
- Software: Emacs, zsh, bash, vim, Tailscale etc...
- Programming: Python (some)

RELEVANT EXPERIENCE:

IT Consultant

Independent Consultant for IT Infrastructure and the Procurement of Computers and Network Technology

- Implemented and deployed networks and migration of accounts for communications overseas from the UK.
- Management and oversight of financial reviews and expenditures of systems.
- Consulting and deployment of different systems as well as peripherals involving networked solutions.
- Regularly advised on software purchases in the fields of backups, web publishing software, and email communications.

Tivoly

Managed File Transfer Administrator

- Implemented secure file transfer protocols and oversaw the planning/expansion of IT infrastructure in the U.S. and abroad in Europe and China.
- Implemented the new online server for back and front end delivery including FTP management access globally for files denoting engineering specifications in the construction for cutting tools involving Airbus and other such companies.
- Designed and executed a three-stage plan for a new e-commerce site with linked database structure.
- Collaborated with design and marketing teams to align with company branding.
- Created large directory structures and maintained organization as well as regularly documented any changes.
- Traveled internationally for photography projects for online and print publications.

Fiverr

SEO Content Creator Consultant

- Implemented strategy internationally for SEO content globally.

- Managed multiple accounts for SEO goals delivery.

IT Consultant, Phoenix, AZ

IT Solutions Consultant

- Provided IT solutions and built custom homes and business information infrastructures, including new office infrastructure at various locales, business servers, personal servers, and back end server solutions for file maintenance and backups, as well as documentation.
- Consulted for Tangent Technologies on various systems, including Linux, Windows, and Mac, including large scale software purchase choices for various businesses and firms.

Freelance Consultant, San Francisco, CA

IT Solutions Consultant

- Consulted for various companies in San Francisco for online IT solutions including file sharing across different networks and setting up different Linux environments for business servers.
- Freelancer to Genentech as a videographer for internal productions using Adobe Premiere.

Association for Interactive Media, New York, NY

Webmaster and Designer

- Integrated dynamic sites and databases, streamlined the look and feel for related sites, dealign with hundreds of member companies who were regularly pushing content out to our site.
- Published online content for member and nonmember services.
- Deployed a new site and design linking all of the previous content together from separate areas.

CoreExpress, Reston, VA

Head Web Designer and Front End to Back End Manager

- Managed a team of designers and engineers for an internet infrastructure company from Reston, VA and remotely in St. Louis, MO.
- Designed and implemented the website, held meetings, and recruited developers as full time employees.
- Consulted with different companies for solutions to our B2B model to link to our front end.

National Weather Service, Washington, DC

Head Designer and Developer

- Consolidated over fifty web sites from fifty different offices and designed a new universal design for NWS offices run by NOAA.
- Managed the move of the site from weather.noaa.gov to weather.gov.
- Consolidated the entire back end infrastructure for publishing local weather reports on an active site from different offices in each state.

Scripps Howard News Service, Washington, DC

Photojournalist, Webmaster, Graphic Designer/Artist

- I created the Internet Department for SHNS, designed and managed the website.
- Installed and configured our new server to link all of our affiliates together for daily story content production.
- Configured a backup RAID server.
- Coordinated with offices all over the United States for FTP scheduling of story uploads to our new server. This also included maintenance of all of the stories, pushing out the stories for print (newspaper and magazine production) in almost every state, coordinating the daily schedules, ensuring uptime, and keeping an eye on developing stories to push out scheduling to our affiliates.
- Covered Washington political events as part of the Washington press corps.

EDUCATION:

The George Washington University, Washington, DC
